# 664410 Theodore, Colorize™

Make a new friend in the gorgeous Theodore.

With brand new Colorize technology from Tim Holtz®, Theodore Thinlits® die set is an intricate paper-layering project which enables you to create more dimensional and professional designs than ever before!

Each base shape has crease blades identifying where to place layers, before adding your mid-tone and highlight dies. Each layering element is labelled to take the guess work out of placing shades, creating amazing multi-faceted layered results. Theodore is perfect for embellishing birthday cards, creating amazing framed art and so much more!

1

### Step 1: Select Cardstock

Each Thinlits® die is labelled to take the guesswork out of selecting and positioning shades, creating amazing multi-faceted layered results! Separate cardstock based on the recommended colour printed on the back of each die.

2

### Step 2: Apply Adhesive Sheet

Apply Sizzix™ Adhesive Sheet (656802, Page 40) to the back of your cardstock for ease of use when layering and adding the intricate elements.

3

### Step 3: Die-Cut and Separate

Die-cut in order of the numbers labelled on the back of your Thinlits. Once cut, separate by colour to group your shapes ready for when you assemble your design.

4

### Step 4: Optional Step - Add Depth

Add colour to the edges of your die-cuts to add depth using a darker shade of coloured ink.

5

### Step 5: Follow the Embossing Lines

Each base shape has crease blades which create embossing lines, helping to clearly identify where to place your layers. Use these lines to place mid-tone and highlight cuts.

Assemble each section of the design, using tweezers to peel and stick the adhesive sheet to secure the layers.

6

### Step 6: Assemble Design Elements to Finish

Once you have layered each component, assemble the final design composing all elements together. Finally, place your Colorize™ design on a project of your choice.

# Patchwork

Our die-cutting machines paired with our fantastic range of patchwork dies are the perfect tool for both beginners and experienced quilters. Our steel-rule Bigz™ dies can cut through a variety of fabrics, even cutting multiple layers at once so that every cut piece is precisely the right size.

This is especially useful when making quilts and eliminates the complications many people face when piecing together irregular shapes made with a ruler and rotary cutter. Each die comes with a built-in ¼" seam allowance to make piecing even easier. The collection includes an assortment of basic shapes that can be combined to create a variety of popular and traditional quilt block patterns.

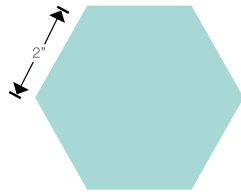

The only limit is imagination!
